pushTAN: Brief instructions for activation

Start the registration as described below only when you have received your registration letter.

If necessary, you will receive a PIN-letter by separate post as well, which contains a new Start-PIN.

Install the free S-pushTAN App from the App Store on your mobile device.

Start the App and answer the question as to whether it may send you the S-pushTAN App push notifications with OK. Start registration and then enter a password.

Use the S-pushTAN App to scan the QR Code printed in the registration letter or use the manual entry.

Your personal activation code, which you need in Step 6, is now displayed in the S-pushTAN App.

Start registration as described below only when you have received your registration letter.

Now use your PC, tablet or smartphone to login to your Sparkasse Online-Banking. To do this, use the “Anmeldename” stated in the registration letter or the “Legitimations-ID”. If you have received a new PIN by separate letter, please use this to login.

After logging in, you will see that you can activate the pushTAN connection. Click on “Jetzt Freischalten” (Activate now) and enter your personal activation code (“Freischaltcode”) from the S-pushTAN App.

Activation is now complete. If you have logged in with a new PIN, Online-Banking will ask you to change the PIN.

The TAN required for this has already been sent to the S-pushTAN App.
