

# pushTAN: Brief instructions for activation

Start the registration as described below only when you have received your registration letter.

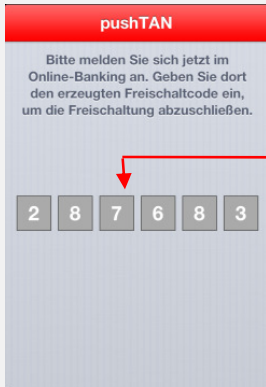

If necessary, you will receive a PIN-letter by separate post as well, which contains a new Start-PIN.

**1** Install the free S-pushTAN App from the App Store on your mobile device.

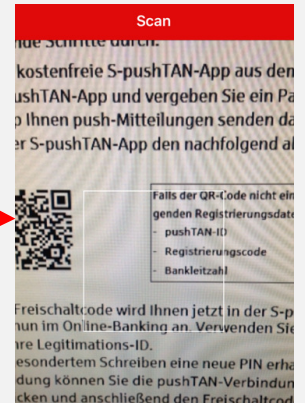

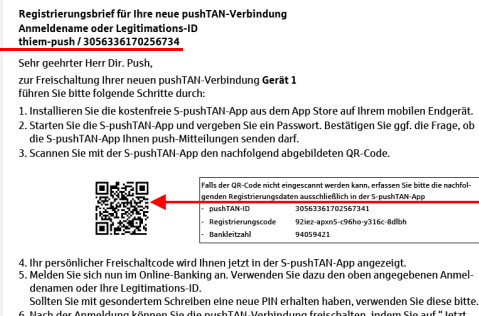

**2** Start the App and answer the question as to whether it may send you the S-pushTAN App push notifications with OK. Start registration and then enter a password.

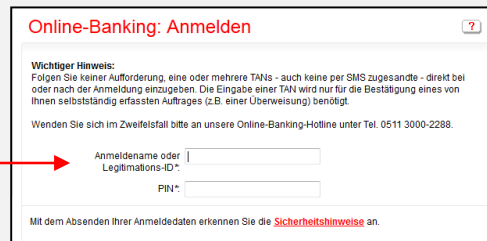

**4** Your personal activation code, which you need in Step 6, is now displayed in the S-pushTAN App.

**3** Use the S-pushTAN App to scan the QR Code printed in the registration letter or use the manual entry.

**5** Now use your PC, tablet or smartphone to login to your Sparkasse Online-Banking. To do this, use the "Anmeldename" stated in the registration letter or the "Legitimations-ID". If you have received a new PIN by separate letter, please use this to login.

**Important:** If you want to use the pushTAN procedure with the Sparkasse App or with finance software such as StarMoney, you just have to set this up for the pushTAN procedure.

**6** After logging in, you will see that you can activate the pushTAN connection. Click on "Jetzt Freischalten" (Activate now) and enter your personal activation code ("Freischaltcode") from the S-pushTAN App.

**7** Activation is now complete. If you have logged in with a new PIN, Online-Banking will ask you to change the PIN. The TAN required for this has already been sent to the S-pushTAN App.
